CAREER OBJECTIVE

Aspiring IT professional currently pursuing BCA, eager to contribute technical and analytical skills to real-world software solutions while continuously learning and evolving in the tech industry.

EDUCATION

Bachelor of Computer Applications (BCA) — PES Institute of Advanced Management Studies, Shivamogga

Currently Pursuing

Pre-University (Commerce) — BGS Gurukula Independent PU College, Bhadravathi

Score: 91%

TECHNICAL SKILLS

Programming Languages: Python, C, Dart, C++, Java, HTML, SQL

Technologies / Frameworks: Flutter, CSS, MS Office, Power BI, AWS (Fundamentals), Canva

IT & Data Tools: Data Analytics, NLP, OpenCV, Firebase, Firestore, Cloudinary, React

Core Competencies: CRUD Operations, Database Queries, Stored Procedures, Manual Testing, Test Case Preparation, Incident Management, IT Service Management (ITSM), Knowledge Base Documentation, Service Ticket Resolution, Communication skills, Team collaboration

PROJECTS

AI Resume Analyzer | **Python, React, NLP**

- Build a full-stack AI-powered tool that parses resume content and matches it against job descriptions using NLP techniques.
- Generates actionable improvement suggestions to help candidates align their resumes with target roles.
- Frontend built with React/HTML for a clean, interactive UI; Python backend handles NLP processing and analysis logic.
- Demonstrates practical understanding of IT service improvement and documentation — directly applicable to knowledge base management in IT support roles.

Second-Hand Goods Vehicle Marketplace App | **Flutter, Firebase, Firestore, Cloudinary**

- Developed an Android application enabling users to buy and sell second-hand goods vehicles with image uploads and vehicle detail listings.
- Integrated Firestore for structured data storage and Cloudinary for scalable image management.
- Applied CRUD operations and real-time database management — aligned with database query and data management responsibilities.

Real-Time Facial Emotion Recognition System | Python, OpenCV, Deep Learning

- Built a Python application that detects faces and classifies emotions in real time using a trained deep learning model.
- Applied computer vision (OpenCV) for video capture, facial region detection, and emotion classification (happy, sad, angry, etc.).
- Demonstrates strong analytical thinking and problem-solving skills in data-driven environments.

CERTIFICATIONS

- 30-Day AI & Data Analytics Online Internship — Hands-on exposure to computer vision, machine learning, data preprocessing, model building, and analytical tools.
- AWS Cloud Quest: Cloud Practitioner — Amazon Web Services — Core cloud concepts, AWS fundamentals, and cloud infrastructure management.
